

PRESTASI BELAJAR MAHASISWA YANG DITERIMA MELALUI JALUR PMDK DAN UMPTN

Odih Suparatman¹

Abstrak: Tujuan penelitian ini adalah untuk mengetahui perbedaan prestasi belajar mahasiswa yang diterima melalui jalur PMDK dan UMPTN. Penelitian ini dilaksanakan di Fakultas Pendidikan Teknologi dan Kejuruan Universitas Pendidikan Indonesia (FPTK-UPI) dengan menggunakan pendekatan penelitian *ex-post facto*. Populasi penelitian adalah seluruh mahasiswa FPTK-UPI, yang dikategorikan dalam dua kelompok yaitu mahasiswa PMDK dan UMPTN. Penentuan sampel dilakukan secara *proportional stratified random sampling*. Jumlah sampel adalah 215 mahasiswa, yang terdiri dari 81 mahasiswa PMDK dan 134 mahasiswa UMPTN. Teknik analisis data menggunakan analisis analisis varians (ANOVA). Hasil penelitian menemukan bahwa: Prestasi belajar mahasiswa PMDK lebih tinggi dari UMPTN ($p = 0,01$).

Abstract: This study was aimed to find out: the difference in the learning achievement of the students selected through the PMDK and those selected through the entrance test (UMPTN). This study was carried out in the Faculty of Vocational and Technology Education of Indonesia Educational University (FPTK-UPI) by utilizing the *ex-post facto* approach. The population of the study was all students of the FPTK-UPI, they were grouped into two groups, that is, those who were selected through the PMDK and those selected through the UMPTN. The sample was drawn by using the *proportional stratified random sampling* technique. The sample consisted of 215 students, comprising of 81 PMDK students and 134 UMPTN students. The data analysis techniques employed were the analysis of variance (ANOVA). The results of the analysis indicated that: The PMDK students' learning achievement was better than the UMPTN students' learning achievement ($p = 0,01$).

Kata Kunci: Prestasi Belajar, PMDK, UMPTN
